# THE DIRTY TRUTHS OF ELECTRONICS COUNTERFEITING

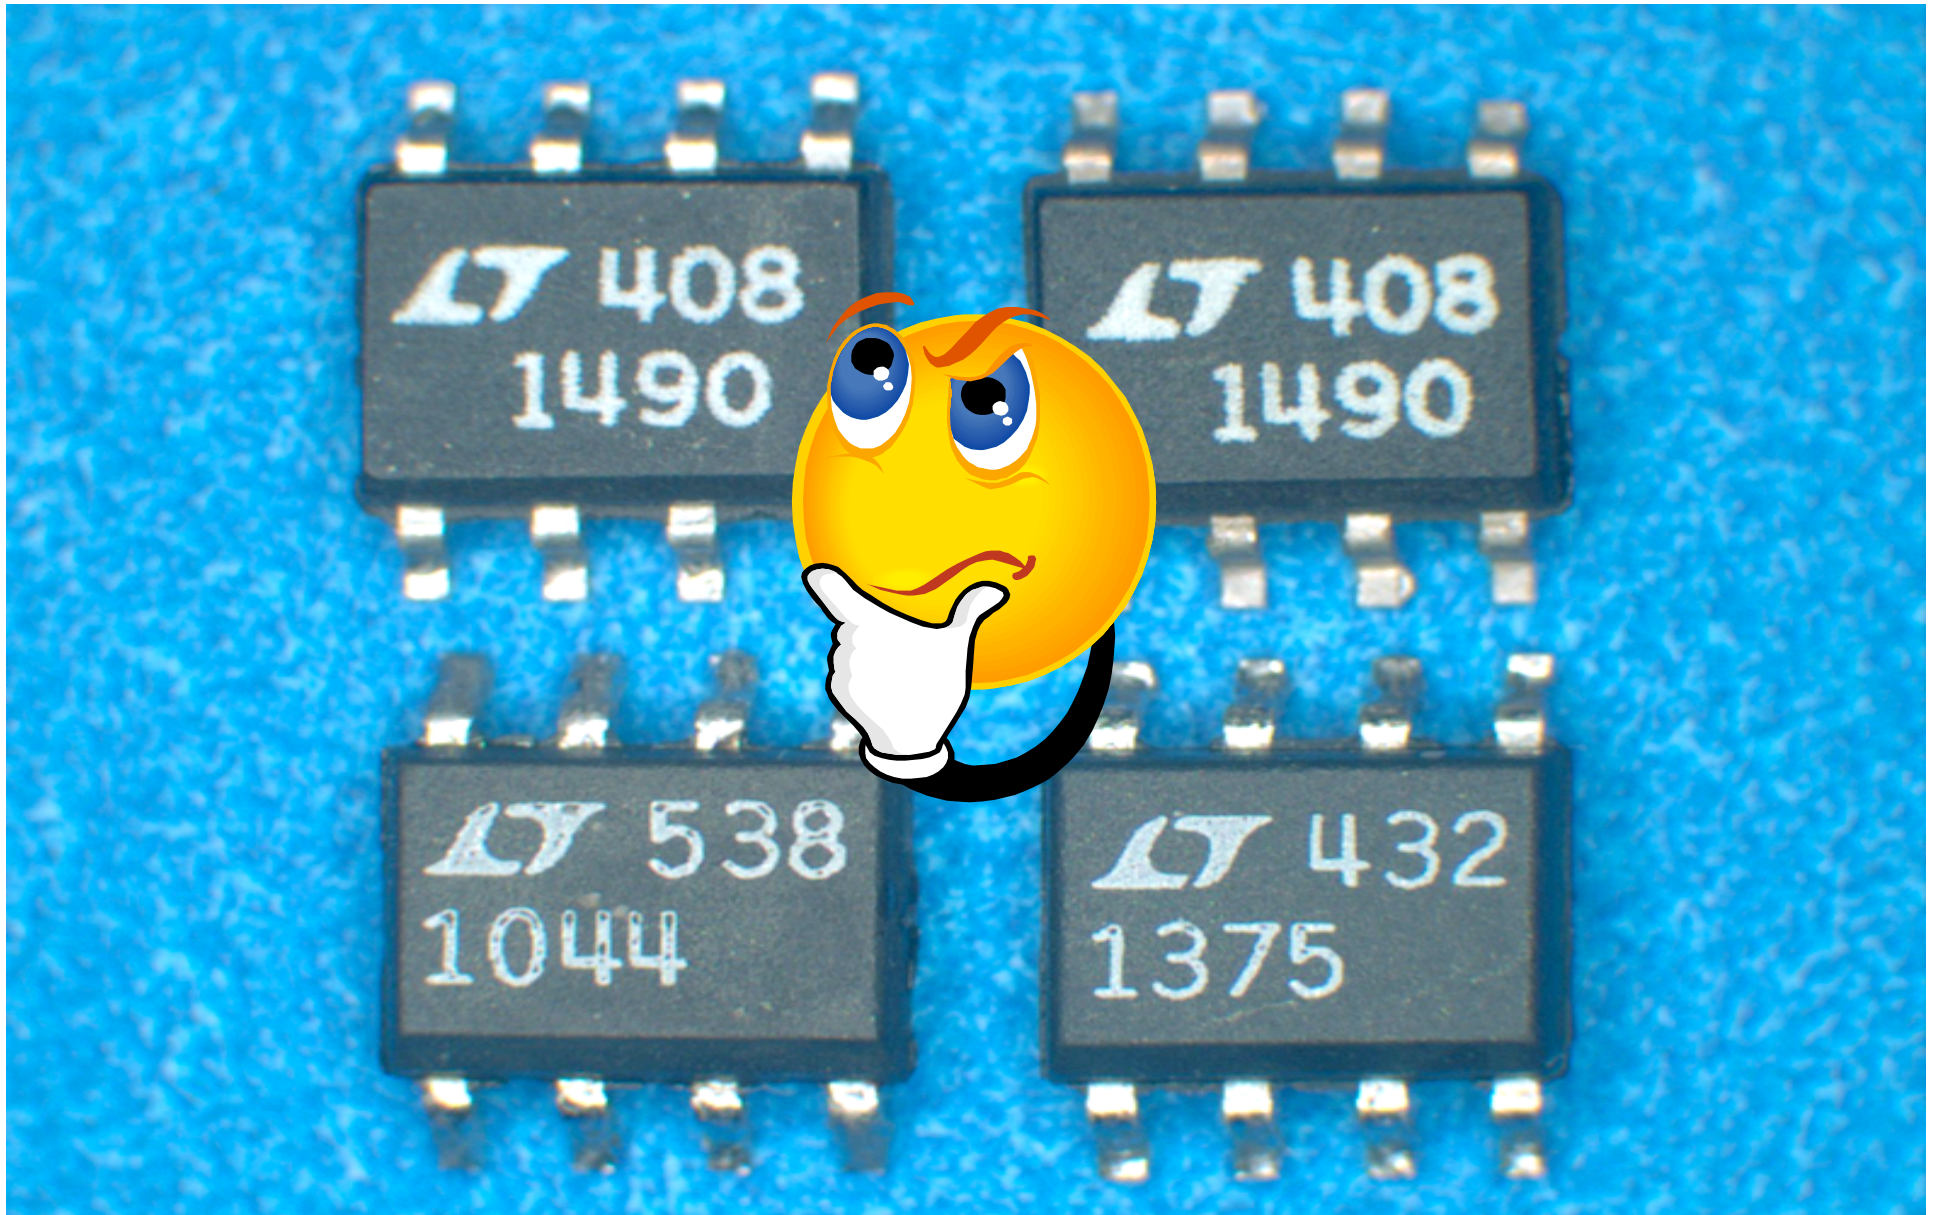

- **Five to twenty percent** of components in electronics distributor supply chains is counterfeit!
- Counterfeiting costs the electronics industry billions annually, in terms of:
  - Decreased customer satisfaction
  - Yields
  - Field failures
  - Need/cost of incoming inspection, DPA, etc.
  - Litigation
- Pervasiveness and counterfeiters' skill is increasing.

***IF YOU CAN MAKE IT THEY CAN FAKE IT***

- Even if it stopped today, it would take years to flush all counterfeits from supply chains.
